Fairport Successfully Implements Backup for Google Workspace with Backupify

backupify
a datto company

The Fairport Central School District is located in New York. It includes 8 schools that are comprised of 6,400 students and 1,500 teachers, administrators, and employees.

Fairport Uses Backupify To Meet Data Retention Needs

"Fairport Central School District wanted to leverage the power of Google Docs with 24x7 access and simple sharing and collaboration, but we were hesitant about fully embracing it within the administration given some of the requirements for data retention within the New York State schedule NYSED ED-1," said Tom Devitt, Director of Technology for Fairport Central School District. Specifically the schedule includes guidelines requiring the retention of original documents, such as board agendas and payroll. As more of Fairport's Google Workspace users became accustomed to the platform, Devitt noticed that more of these schedule-governed documents were originating within Google Docs, necessitating an archiving solution for Fairport's Google Workspace domain.

Fairport Uses Backupify's Easy-To-Use Interface

Devitt was impressed with Backupify's solution. "The interface was very simple; it was easy to search and access the files. It was also important to be able to pull down a local copy of the data, which Backupify does." Ultimately, Devitt chose Backupify. "Education customers must rely on vendors in this emerging Google Workspace for Education market to make good on their promises to develop their product to match the needs of schools. It was clear to us during our sales process that Backupify was willing to work closely with us to evolve their product."

Fairport Confidently Rolls Out Google Workspace

"Backupify was the missing piece to being able to confidently roll Google Workspace out to my whole organization. School districts must adhere to strict regulations regarding archiving of email and documents. Backupify helped ensure we were compliant."

About Backupify

Backupify, a Datto company, is the leader in cloud-to-cloud backup, enabling enterprises to extend data protection and accessibility best practices to the cloud. Backupify gives IT professionals the security and control they need against data loss from user errors, external threats, and service failures.

"

BACKUPIFY WAS THE MISSING PIECE TO BEING ABLE TO CONFIDENTLY ROLL GOOGLE WORKSPACE OUT TO MY WHOLE ORGANIZATION. SCHOOL DISTRICTS MUST ADHERE TO STRICT REGULATIONS REGARDING ARCHIVING OF EMAIL AND DOCUMENTS. BACKUPIFY HELPED ENSURE WE WERE COMPLIANT.
